-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 12 October 2005.
- 2a) This action is **FINAL**.
- 2b) This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsubara (5,870,939).

Matsubara discloses the invention including:

- Claims 1, 2 and 8; a saw unit, a motor 4b having an armature, a saw blade 4a, a base 7, a turntable 2, a bracket (see Fig. 1); a supporting member 5, a guiding groove (9a-b and 32), a ram (3 and 3a), a hinge pivot shaft 4c.
- Claim 2; a front end portion of the ram extends beyond the edge of the turntable (see Fig. 1).
- Claim 3; an elongate slot (see Fig. 3).
- Claim 7; restraining means (9a-b).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3724

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsubara (5,870,939) in view of Batson (4,265,154).

Matsubara discloses the invention substantially as claimed except for first and second supporting members, an elastic member and a guiding channel. However, Batson teaches the use of first and second supporting members 26, an elastic member 78 and a guiding channel 82 for the purpose of enabling accurate orientation of the fence relative the base support structure. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Matsubara's device by providing the first and second supporting members, the elastic member and the guiding channel as taught by Batson in order to obtain a device that enables accurate orientation of the fence relative the base support structure.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. De Walt, Sexton, Meek et al., Barsotti, Freeburger and Singer are cited to show related device.
